Main differentiators

❖ A dynamically managed strategy that seeks to add value on four levels: asset allocation, security selection, asset location (making an active decision on how to gain exposure to a company within its capital structure) and duration management.

❖ GSAM's "Best Ideas, Go Anywhere" integrated approach allows for investment opportunities across the full "yield continuum" of equities and bonds, in both traditional and non-traditional asset classes.

❖ Balanced U.S. focused approach, tactical in nature, with currency risk management in the fixed income allocation.
